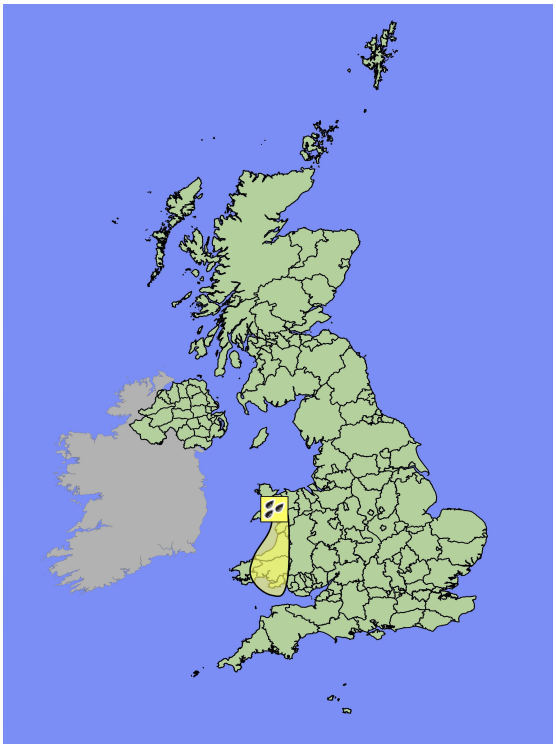
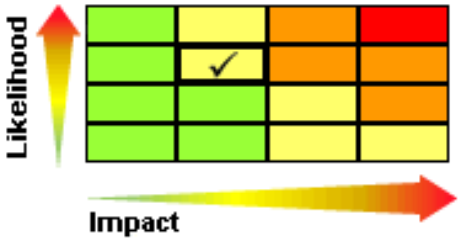
National Severe Weather Warning Service





Chief Forecasters Assessment
Thundery showers this afternoon are likely to give 10 to 15 mm in an hour and perhaps 20 to 30 mm in 3 hours or less. As often happens in showery situations some areas will miss the showers.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **13:00 on Mon, 11th Jun 2012** until **22:00 on Mon, 11th Jun 2012**

Showers already developing across parts of Wales will become heavy and possibly thundery this afternoon and persist into this evening. The public should be aware that following recent heavy rain, the ground is saturated, so as well as showers causing localised surface water flooding there is a low risk of river flooding.
